

RETURN ON RENOVATION COSTS

One rule seems to apply in all cases: avoid projects that will set your house apart from the properties in your neighbourhood. The Appraisal Institute of Canada posts this warning on its website: "If the value of your house exceeds the average market value in your neighbourhood, your renovations will not yield much return. But if your house value is below the average, you can recover a larger part of the renovation costs."

Also bear in mind that the amount spent on renovation projects should not be relative to the value of the dwelling: A \$30,000 remodelled bathroom does not belong to a \$100,000 house.

PERCENTAGE RECOVERED ON RESALE

Kitchen upgrade:	75% to 100%
Bathroom upgrade:	75% to 100%
Interior painting:	50% to 100%
