The maximum amount of the security deposit that a customer is required to pay is calculated using:

- 2.5 times the estimated bill based on the customer's average monthly load with S.T.E.I. in the most recent 12 consecutive months within the last two years.
- Where relevant usage information is not available for the customer for 12 consecutive months within the past two years, the customer's average monthly load shall be based on a reasonable estimate made by S.T.E.I.
- Where a customer has a payment history which discloses more than one disconnection notice in a relevant 12 month period, S.T.E.I. may use the customer's highest actual or estimated monthly load for the most recent 12 consecutive months within the past 2 years for the purposes of calculating the maximum amount of the security deposit.
